

YOUR IMPACT

MAP
MEDICAL AID FOR
PALESTINIANS

**HOW YOUR SUPPORT IS
CHANGING LIVES WITH MAP**

THANK YOU FOR YOUR UNWAVERING SUPPORT

**Your support ensures we can deliver vital care.
Thank you for standing in solidarity with
Palestinians in 2024 and beyond.**

Over the past 18 months, delivering our mission has been incredibly difficult. Under Israeli occupation, Palestinians have faced escalating violence, atrocities and brutal oppression, which has made delivering life-saving assistance in Gaza, the West Bank and Lebanon more challenging than ever.

But our community is determined, compassionate and resilient.

With your help, MAP's response has grown significantly, reaching over one million people with urgent aid and supplies.

As we look ahead to the future, MAP and all our local partners continue the vital and necessary work you'll read about today, so we can save more lives. For this, your support is crucial.

Thank you for your kindness and support.

Alongside local partners, MAP has been providing vulnerable communities across Gaza, the West Bank and Lebanon with urgent support.

WHERE YOU HAVE MADE A DIFFERENCE

LEBANON

46,045 people, primarily mothers, children and young people, were helped through our programmes in 2024.

WEST BANK

43,597 people were reached with emergency medical and food interventions.

GAZA

650,000 people were supported with medical care.

WEST
BANK

GAZA

**“YOUR SUPPORT
HAS ENABLED
US TO PROVIDE
ESSENTIAL
SERVICES TO
PEOPLE WHO
MOST NEED IT.”**

MAP's Solidarity Polyclinic is one of the few remaining lifelines in a healthcare system that has been systematically dismantled by the Israeli military. The clinic offers vital medical aid and comprehensive health services including physiotherapy and mental health care.

Asmaa, who facilitates mental health support at the Solidarity Polyclinic in Gaza, shares her experience:

"The children who come to see us are often deeply affected by the constant stress and anxiety of living in a warzone. Some also suffer from war-related injuries, including physical disabilities.

"Before the play therapy sessions at the clinic, many of the children are withdrawn and fearful, often hesitant to engage with others.

We give the children a safe space for them to express themselves through play, dancing, singing and drawing, and gradually they open up and show enthusiasm. Drawing allows them to express their feelings in a way that words often cannot."

"I have been coming to the physiotherapy here at MAP since November 2024. I have improved a lot since coming to the Polyclinic."

*Names have been changed to protect people's identities.

Rana*, aged 10, from northern Gaza has received over 60 physiotherapy sessions for her leg, which was severely injured by shrapnel. Thanks to these sessions, funded by your donations, Rana can now walk on her own.

IN GAZA

PROVIDING SAFE, CLEAN WATER

More than one million refugees are living in camps and dilapidated shelters after Israel's military assault forced them to flee their homes. In 2024, MAP's WASH (water, sanitation and hygiene) programme became the **second-largest provider of safe drinking water to displacement camps.**

12 MILLION LITRES
OF SAFE DRINKING WATER
DELIVERED THANKS TO
YOUR SUPPORT

Amany in her home.

AMANY'S STORY

When the Israeli military ordered civilians in northern Gaza to evacuate to the south, Amany's husband, a paramedic, was killed. She had no choice but to flee with no financial support.

Amany explained, "Being displaced means there is no water. You can't wash your hands or clothes. You don't have

clean water to drink and might have to drink dirty water, which can make you sick or even kill you."

With support from MAP, ShelterBox and our local partner the Social Development Forum, Amany received water through our daily water trucking activities.

IN LEBANON

PROTECTING MOTHERS AND CHILDREN

Palestinian refugees are excluded from accessing the Lebanese public health system, meaning MAP's community midwifery services in refugee camps here are critical.

MAP's adaptable, community-embedded approach ensures that mothers and children most at risk of harm continue to receive the care and support they need during times of crisis.

Following the escalation of Israel's attacks in September, the project swiftly adapted to meet the needs of displaced women and children, with our midwifery teams mobilising to provide care in displacement shelters. These teams provide counselling for pregnant women, lactating mothers, and babies, as well as conducting group awareness sessions focused on nutrition, health and maintaining hygiene during emergencies.

IN LEBANON

EMERGENCY MEDICAL MISSIONS

Israel's attacks on Lebanon resulted in widespread destruction, thousands of casualties and mass displacement. This left families – including Palestinian refugees in camps across the country – seeking protection in both formal and informal shelters. MAP responded with 10 emergency medical missions between October 2024 and March 2025.

Two healthcare workers assist a mother and child.

"I'M VERY HAPPY THAT TODAY I SAW YOU COMING TO CHECK MY BABY. I WAS VERY SCARED, I DIDN'T FEEL HIM MOVING IN MY BELLY. TODAY IS BETTER."

Nadia*, a mother supported by MAP in Lebanon

IN THE WEST BANK

BRINGING HEALTHCARE TO COMMUNITIES

MAP's mobile clinic continued to bring critical primary healthcare services to marginalised communities in the West Bank, where access to basic services remains severely restricted. As escalating Israeli violence and settlement expansion deepened isolation, many communities became unable to reach health facilities in nearby towns or cities.

MARIAM'S STORY

Mariam relies on the mobile clinic to access essential care for her 17-year-old son. She explains, "The mobile clinic team has been incredibly supportive. My son, who has

a disability and is unable to walk or talk, receives regular home visits from them. They even provided him with a special bed, mattress and fan, which have greatly improved his comfort and wellbeing."

MAP's mobile clinic team.
